

DOSATRON®

WATER POWERED DOSING TECHNOLOGY

EASY BIOSECURITY FOAMING SYSTEMS

Wall Mounted or Portable

Simple to install and easy to use . . . all you need is a garden hose connected to the Dosatron unit and your selection of chemical for sanitizing.

Portable DosaCart, with filter and check valve, can deliver at a rate of 500:1 - 50:1 through our airless foamer using the length of hose required. A delivery rate of 256:1 (1/2 ounce per gallon) is an example of a common chemical dilution rate.

800-523-8499

The Dosatron airless foam system assures that your biosecurity needs are met by generating a rich, wet foam providing longer contact time and better penetration of the chemical.

Sanitizing vehicles, crates, pens, mats, walls, and floors can be done effectively with the Dosatron airless foaming system.
