DOSATRON INTERNATIONAL INTRODUCES NEW D14 – 14 GPM CHEMICAL INJECTOR TO VEHICLE WASH MARKET --Award-Winning D14 Technology Is Ideal for Injecting Aggressive Chemicals--

CLEARWATER, Fla, February 10, 2009 – [Dosatron International, Inc.](http://www.dosatronusa.com) today announced the continued growth of its line of chemical injectors for the vehicle wash market with the introduction of the new [D14 – 14 GPM](#) series of injectors in PVDF. These injectors increase Dosatron's ability to inject aggressive chemicals with minimal maintenance and maximum efficiency.

The D14 features a metal-free piston and a highly chemical resistant housing, making it ideal for handling vehicle wash applications that use hydrofluoric acid (HF and ABF), such as presoaks and wheel cleaners. Its award-winning design uses 67% fewer parts than previous Dosatron models, making it one of the most easily maintained chemical injectors on the market.

“Since we first entered the vehicle wash market 16 years ago, Dosatron has been working to find improved solutions for the unique needs of car wash owners and their customers,” said Dosatron President Eddy Kelly. “When we introduced the [D25RE2](#) several years ago, we became a true presence in the industry. With the addition of the D14 to our vehicle wash offerings, we are one giant step closer to our goal of being a one-stop chemical management solution shop for vehicle wash.”

The D14 is available for vehicle wash applications in two models. The [D14MZ2PVDF](#) has a dilution range of 500:1 to 50:1 and replaces the DI16PVDF-HC model previously sold for HF and ABF applications. The [D14MZ10PVDF](#) replaces the DI150PVDF-HC with a dilution rate of 100:1 to 10:1. As with all Dosatron chemical injectors, the D14 series is backed by Dosatron's world-class customer service team.

More information about the D14 – 14 GPM series is available via Dosatron's customer service center at 800-523-8499, or on Dosatron International's website at www.dosatronusa.com.

About Dosatron International

Dosatron International, Inc. is an industry leader in water-powered, proportional chemical injectors. Dosatron products are manufactured according to ISO 9001:2000 and ISO 14001:2004 standards by Dosatron International S.A.S., part of United Technologies Corporation, U.S.A.
