### **DOSATRON INTERNATIONAL INTRODUCES NEW D14MZ520 --Phase-Out of DI Series Continues With New Addition to Popular D14 Series--**

CLEARWATER, Fla, February 9, 2010 – [Dosatron International, Inc.](http://www.dosatronusa.com) today introduced the latest addition to the D14 series, the [D14MZ520 chemical injector](#). The D14MZ520 replaces Dosatron's DI520 model, continuing the company's phase-out of DI technology in favor of award-winning D14 series technology.

"Since the introduction of the D14 series in early 2008, the feedback has been overwhelmingly positive in favor of the new technology," said Dosatron President Eddy Kelly. "Our customers love the simplicity of the design, and the consistency of the results, coupled with the ease of use and maintenance, make the D14 series the clear future of the industry. We're thrilled to continue the rollout with the new D14MZ520."

The D14MZ520 features an injection range of 1:20 to 1:4, or 5 to 25%. As with all D14 series models, the D14MZ520 is manufactured from chemical-resistant polypropylene and features a metal-free piston, which makes it well-suited to the injection of caustic chemicals or chemicals that can erode metal parts. Unique to the D14MZ520 is an external, dual-action injection system, which injects on both the up- and down-strokes to create a more consistent blend. The D14MZ520, like all Dosatron injectors, is also backed by Dosatron International's world-class customer service.

The D14MZ520 is available wherever Dosatron injectors are sold. More information is available via Dosatron International Customer Service at 800-523-8499, or via the Dosatron International website, [www.dosatronusa.com](http://www.dosatronusa.com).

#### **About Dosatron International**

Dosatron International, Inc. is an industry leader in water-powered, proportional chemical injectors. Dosatron products are manufactured according to ISO 9001:2000 and ISO 14001:2004 standards by Dosatron International S.A.S., part of United Technologies Corporation, U.S.A.
