High Flow, Multi House Medicators

Treat multiple houses with one medicator!

With Dosatron’s higher flow medicators, the NEW D8RE2 - 40 GPM and the D20S - 100 GPM, you can now treat multiple houses with just one medicator saving you time, money, and space! They can also be installed at the wellhead.

The new polypropylene, D8RE2 - 40 GPM medicator provides outstanding chemical resistance and it consistently dispenses most concentrates from 0.2% to 2%.

The NEW D8RE2 - 40 GPM features:

• Chemical resistant polypropylene housing
• Easy-to-adjust injection rates
• Easy-to-read graduated scales

The D20S - 100 GPM Dosatron has a water flow range of 5 to 100 GPM and a dilution range of .2% to 2%. Both medicators provide the higher flow needed to treat multiple houses and are water-powered so no electricity is necessary.

Both models are compatible with:

• Medications
• Water acidifiers
• Line cleaners
